Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 8 recites the limitation "the heat pump" in claim 8, line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,6,7 and 8 rejected under 35 U.S.C. 103(a) as being unpatentable over McFadden (US Patent No. 5,373,704) in view Maisotsenko (US Patent No. 5,453,223). McFadden discloses a two path air stream conditioning and recirculating system comprising: a system (10) for cooling/heating, a heat exchange wheels (20,26) that are suitably enclosed in partition case (30), a first air stream passageway (34), a second or regenerative air passageway (34) whereby a portion of each wheel is disposed within each passageway, blower fans (40,46) also within a partition case, air intake (42), regenerative air stream (34), return conduit (60), externally regenerative air stream (48) and furthermore heat means (see column 4, line 65). McFadden, however lacks to mention a first & second air flow having a part crossed. Maisotsenko teaches a first & second air stream partly crossed. Therefore, it is deemed by Examiner that it would have been obvious to one of ordinary skill in the art at the time the invention was made

Art Unit: 3744

to modify the disclosed invention of McFadden with crossed air streams as taught by Maisotsenko thereby providing a cooler air stream with out changing moisture content.

Allowable Subject Matter

Claims 3-5 and 9-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Jones whose telephone number is (703) 305-0251. The examiner can normally be reached on Monday - Thursday.
